Henrique (Nas) Nascimento, Senior Fullstack Engineer, Mobile Specialist

Software developer with 6+ years of experience, specializing in mobile apps using Flutter. I've also worked on web frontends, backends, and fullstack projects.

I enjoy being involved in every stage of a project, from shaping ideas and designing features to writing code and shipping the final product.

Tech Skills

⭘ Flutter / Dart	⭘ iOS / Android
⭘ React / React Native	⭘ Firebase
⭘ Javascript / Typescript	⭘ Git / GitHub
⭘ Node.JS	⭘ SQL / noSQL database
⭘ PHP, Kotlin, and Java	⭘ Infrastructure
⭘ Go and Rust	⭘ Product Design and UI/UX

Professional Experiences

Senior Fullstack Software Engineer - Mobile Specialist at Will Bank, SP - Brazil

October 2024 — Present

I lead the development of mobile solutions for Insurance, Top-ups, and Wallet products, continuously enhancing user experience and product performance. Conduct data-driven product discovery and prototyping, leading to innovative features that increase sales and user engagement.

Collaborate with cross-functional teams to deliver high-quality software solutions, ensuring timely project completion and adherence to best practices.

My technical expertise spans mobile development (Flutter, iOS, Android) and Node.js for robust backend solutions. I also have experience with Kotlin/Java, Go, and Rust.

Senior Mobile Engineer at Compass UOL, RS - Brazil

April 2023 — October 2023

I held the position of a senior Flutter engineer, acting as a specialist and consultant to the mobile squad. Since the inception of the project, I was leading the mobile architecture decisions, design patterns, security, and other critical topics. As Flutter specialist, I actively engage in discussions and provided guidance on key aspects to ensure the project's success.

Senior Mobile Engineer at Atlas Technologies, RS - Brazil

April 2022 — April 2023

In my past role as a Flutter web/mobile engineer, I developed a secure chat application for web, iOS, and Android platforms. Employing agile methodologies, I ensured efficient development processes and timely delivery. The chat application was designed to establish secure connections between two entities: service providers and consumers. This experience allowed me to leverage my skills in Flutter development while prioritizing user safety and seamless communication.

Mobile Guild Leader at Sambatech, MG - Brazil

February 2022 — April 2022

During my time at Sambatech, I quickly advanced within the company and assumed the role of React Native Guild Leader. In this leadership position, I guided fellow developers in their professional growth and collaborated with them to find optimal solutions for complex situations.

Mobile Software Engineer at Sambatech, MG - Brazil

November 2021 — April 2022

At Sambatech, I served as a web and mobile engineer, utilizing React and React Native, within a software house. I actively contributed to three projects, with two initiated from scratch and one in its final stages. Each project centered around data streaming, specifically video and audio. My responsibilities encompassed analysis, architecture planning and design, cross-platform development for web and mobile, publishing on App and Play Store, as well as testing, production support, and maintenance.

Mobile Software Engineer at Magazord, SC - Brazil

September 2021 — November 2022

As the lead developer, I successfully managed an e-commerce project using Flutter and developed an e-commerce administration application with React Native. This experience allowed me to gain proficiency in technologies such as React Native, Flutter, Firebase, and Node.js.

UX/UI Designer at Effecti, SC - Brazil

March 2021 — August 2021

After honing my skills in design and research, I transitioned from a developer role to work as a UX/UI Designer. This opportunity arose within a company that boasted four major products. Notably, during my tenure, the company grew from a startup to a team of 200 employees. In my role, I applied UX research techniques to drive the development of new features and enhance existing products.

Fullstack Developer at Effecti, SC - Brazil

September 2019 — March 2021

I began my journey at the company as an intern and swiftly progressed to the role of Full Stack Software Developer within three months. Working in a SaaS company specializing in government bidding, I actively contributed to the implementation of new features, products, and bug fixes using agile methodologies.

My proficiency extends across a diverse range of technologies, including Flutter, JavaScript, VueJS, Java, Dropwizard, PHP, PostgreSQL, ElasticSearch, Kafka, and RESTful APIs. Through my involvement with these technologies, I have gained valuable experience in building robust solutions and delivering high-quality software.

Backend Developer at Casa Automação, SC - Brazil

July 2019 — September 2019

My first professional experience as a developer was with a small commercial/tax automation company, where I served as a backend developer. During this role, I gained valuable expertise in technologies such as Java, PHP, and databases like Postgres and Firebird. This opportunity allowed me to contribute to the development of backend solutions and deepen my understanding of software development practices.

Education

Computer Science (not finished), Instituto Federal Catarinense, Rio do Sul, SC - Brazil

January 2018 — January 2021

Bachelor's in Mobile Development (not finished), UNOPAR, Curitiba, PR - Brazil

September 2021 — September 2022

About me

I am truly passionate about different worlds, and discovering new ones all the time:
I love watching movies at the cinema and reading critical texts about them; I can't remember when I started playing instruments and being so connected to music; design and architecture are part of me; video games have guided my entire career; and many personal universes that I immerse myself in;

Motivated by creativity, I feel fulfilled when I participate, from start to finish, in the construction of real products that improve the quality of people's daily lives.

If you value explorers who can't perform a single function in the world, but on the contrary, want to participate and learn as many things as possible, let's connect!!
